

## Meteab Alajmi

---

Highly motivated Engineer who is focusing on building up more technical skills through pursuing opportunities in the field of software engineering while delivering hard work. Excellent team spirit when working under pressure and paying attention to details. Looking forward to shaping a long-term career in the field of Information Technology.

### Education

**Bachelor of Science in Software Engineering - B.Sc. [2017-2021]**

**King Saud University Riyadh, Saudi Arabia**

### Training

**Monitoring and Reporting Dept., Digital Information, NIC, SDAIA**

### Projects

- **Saudi Arabia Hospital Marketplace (Graduation project)**

SAHM is a easy to use system from scratch. It gives you the ability to book an appointment to any hospital within the kingdom. It gives you the list of hospitals and gives you all the details, from who will treat you, to the early next appointment.

- **Sudoku Game**

My team and I made a simple sudoku game that consisted of 3 difficulties. We also added some helpful tools like the notes, undo, and redo.

### Skills

#### Technical Skills:

- **Programming languages:**  
Java, Python, PHP, HTML5, CSS
- **Database Management systems:**  
mySQL
- **IDEs:**
